[Demartek Evaluation - Dell/Samsung/Aerospike Fraud Prevention Solution](#)

As innovation drives ever-increasing performance of computing hardware, application and user demands grow to take advantage of those improvements. Data is also growing at exponential levels, and that data has to be delivered and processed efficiently. Dell commissioned Demartek to validate the performance of a complex fraud prevention analysis workload powered by the Aerospike NoSQL database running on a cluster of Dell PowerEdge R730xd servers with Samsung's SM1715 NVMe SSDs. Have a look at the full report for more details.

[Demartek Browser Statistics Now Logging Windows 10 Usage](#)

It should come as no surprise that we love statistics. We not only enjoy compiling data in regards to lab validation and testing of new servers and storage, but also studying how our audience obtains this information. All of this is in an effort to provided our findings in the best way possible to you, the viewer. That's why every month we update the statistics on how our website is accessed and have recently updated it to included Windows 10. Have a look!

Word from the President

We continue to explore new workloads and configurations of systems in our testing, and are excited to share these results with you in our reports, videos and at conferences. In addition to this newsletter, be sure to follow us on Facebook, LinkedIn, Twitter or YouTube to get the latest on our activities.

As we move into the holiday season, we are very thankful for the work that we get to do and the friendships that we have developed over the years. We have been truly blessed.

Dennis Martin, President, Demartek
