Word from the President

2017 is shaping up to be a very interesting year. We already have a glimpse into some new technologies that will come to market this year. We published our RoCE Deployment Guide that took advantage of 25GbE and 100GbE technology and we expect to see their usage increase as the year progresses. We're working with promising new server and storage technologies, and look forward to publishing some interesting results later this year. We're also experimenting with using video on our web pages such as our CES 2017 commentary page.

2017 is off to a great start, and we wish you well!
