[Demartek Evaluation of HPE 3PAR Snapshots](#)

All-flash arrays are becoming increasingly common in the data center and HPE 3PAR all-flash storage systems allow customers to fully exploit their performance capabilities. Snapshots, storage domains, user roles, and priority optimization are all covered in our latest testing of HPE 3PAR Snapshots.

10. [Demartek Evaluation: HPE 3PAR Snapshots](#)

Be sure to check back every Monday to see which reports have made the Top Ten List. The [current top ten list](#) can also be viewed on the Demartek website.

Word from the President

2017 is off to a great start, and we're looking forward to new technologies that will begin to be adopted this year. These include the next generation of servers, ramping up of 25Gb Ethernet and 32 Gb Fibre Channel, and new types of flash storage systems. We are also expanding our base of workloads and configurations that we run in real customer environment conditions. We would be happy to discuss these with you!

Dennis Martin
Demartek President
